Tools for guys who don't  
punch out at five.

Introducing the wide line of professional quality  
Plumb hammers and hatchets.

**COOPER** Hand Tools

# Designed for performance

## Hard-hitting tools that make your job easier

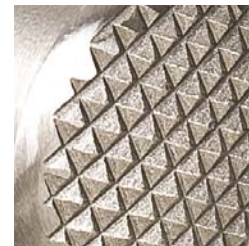

The wide line of Plumb hammers and hatchets consists of a full selection of products designed for the professional tool user. This line consists of over 30 different models of nail hammers, and also includes ball peen hammers, heavy hammers, tradesmen's hammers, and hatchets. All are backed by the extensive manufacturing experience and knowledgeable customer service provided by Cooper Hand Tools.

New this year are two completely redesigned nail hammer selections: Pro Series Premium Fiberglass hammers and Solid Steel Anti-Shock hammers.

The Pro Series Premium Fiberglass models feature an oversized striking area for improved efficiency and faster nailing, a co-molded grip with a flared end for greater control, and the exclusive

Permabond® head-to-handle chemical bonding process.

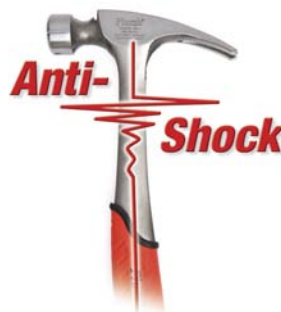

The Solid Steel Anti-Shock hammers also feature an oversized striking area for a larger "power spot." They have a new magnetic nail starter for easy nail starting, patented anti-vibration technology to absorb shock and minimize fatigue, and a new dimpled, co-molded grip.

Checked face on selected models provides increased control when driving nails.

Oversize striking area provides larger "power spot" for faster nailing.

Patented anti-vibration technology absorbs shock and minimizes fatigue.

### The Plumb Advantage:

"Thumb-saving" magnetic nail starter on solid steel hammers saves time and reduces chance of injury.

Dimpled grip provides improved control and reduces transmission of vibration.

Flared grip end for improved grip and less slippage while striking.

### The Plumb Advantage:

Heads and handles on wood and fiberglass styles are fused together with the exclusive Permabond® chemical bonding process, completely sealing out moisture.

Unique beveled edges on both curved claws and ripping claws for superior nail-pulling grip.

Virtually unbreakable fiberglass handle is lightweight and corrosion-proof.

## Preferred by industry

Look around any plant and you're likely to find Plumb products. That's because Plumb offers the wide selection of products required by industrial users. And because every Plumb product is backed up by the expertise and service provided by Cooper Hand Tools.

## A choice of handles

Natural wood, lightweight fiberglass, or nearly indestructible solid steel with anti-shock technology ... Plumb has all three, so you can choose the material that best fits the type of work you do.

### Wood

The traditional choice for wood handles is North American red hickory. The continuous fibers of this fine stock give great resilience and strength, while minimizing impact shock.

### Fiberglass

Fiberglass can't rust, rot, or corrode. It's lightweight, but is nearly unbreakable. Plumb fiberglass-handled hammers feature a non-slip, contoured grip for increased comfort and reduced fatigue.

### Solid Steel

Solid steel hammers are nearly indestructible. Plumb solid steel hammers feature an anti-shock design that cuts vibration and increases comfort.

## Built to swing easy and hit hard.

Since 1856, serious tool users have recognized the quality built in to each Plumb product. The steel used to make Plumb hammers and hatchets is specially heat-treated to make each part of the tool ready for the specific job it has to do.

### **Nail hammers:**

Nail hammers feature wood, fiberglass, and solid steel handles in both rip claw and curved claw styles. Regular and premium selections offer head weights ranging from 13 to 28 ounces.

### **Ball peen hammers:**

Ball peen hammers are available with either fiberglass or hickory handles, with head weights ranging from 4 to 40 ounces. All heads are secured with the exclusive PermaBond® process.

### **Brick hammers:**

Brick hammers are available with fiberglass, hickory, or solid steel handles, with head weights ranging from 15 to 24 ounces. All feature forged heads with a specially heat-treated flat pick end.

### **Scaling hammer:**

The Plumb scaling hammer is offered with a hickory handle and 16-ounce head. Its horizontal and vertical flat pick ends are specially hardened for effective material removal.

### **Prospecting hammers:**

Prospecting hammers are available with fiberglass or hickory handles, with a 16-ounce head weight. All feature a specially hardened pointed pick end for effective material removal.

### **Heavy hammers:**

Plumb heavy hammers are available in blacksmith and hand drilling styles with head weights from 32 ounces to 64 ounces. All are double faced and feature hickory handles.

### **Hatchets:**

Hatchets are available in broad, wallboard, rigster, half-hatchet, and California lath styles, with head weights between 24 ounces and 36 ounces. All styles feature hickory handles.

### **Shingling hatchet:**

The Plumb professional shingling hatchet features a full-polish 24-ounce head with an adjustable course gauge, checkered face, draw knife inner blade, and a hickory handle with leather lanyard.
